

AUTOMIC

Delegates' Unit AMic

Description

Within the AUTOMIC system the delegates' unit AMic serves as a microphone unit and is equipped with a button to switch the microphone on and off or (depending on the operating mode) for requests to speak. A loudspeaker is included to each unit for decentralised sound reinforcement.

The black/grey housing consists of impact resistant plastic and if desired, the housing upper part can be supplied in other colours. So it is relatively simply possible to give to the equipment your personal note, or adapt it to your interior.

The operating modes are managed by the ACen central control unit, the APad microphone switchboards or the MicControl software.

The microphone units will be connected with one single cable for voltage supply, audio and control signals (Daisy Chain).

Technical Data

Complies with international standard IEC914

Connections

- Connector socket (Minicon) for connecting a microphone TM58/6
- Connector socket (S8G-GJ) for connecting further delegate units
- Connecting cable (plug standard S8G-GJ) length 2.5m, permanently attached

Features

- Microphone key (illuminated) on/off/request for the floor
- Integrated loudspeaker for decentralised sound

Housing

- Impact resistant plastic
- colour: grey/black
- housing lower part: plastic, black
- housing upper part: plastic, grey painted (other colours on request)
- W x H x D: (100 x 21/60 x 160)mm
- Weight (including cable): 700g
