

DIGIVOTE® III

Storage and Charging Case TK50-DVIII

BRÄHLER ICS is committed to continually improving its products and so reserves the right to make technical modifications without notice.

Description

The TK50-DVIII transportation and storage case is designed for storage and transport of 50 DIGIVOTE III wireless voting units VD30.

Beyond that the TK50-DVIII can be used also as charging cases. The integrated power pack must only be attached to mains power.

For charging, the voting units are equipped with charging pins. Only place a unit into one of the charging trays. After the units have been in use for a whole day, it is recommended that they be recharged overnight. A longer charging time will not harm the rechargeable batteries.

The voting units and charging trays are serially numbered. This makes it possible to

keep tabs on the distribution and return of the units. It is also a means of ensuring that even at very big events, all units that have been used are recharged regularly.

The storage tray is set into a robust case with a detachable lid. The case is designed to be secured by a padlock and fitted with a sturdy fold-away handle for lifting and carrying purposes.

Technical Data

- 50 storage trays
- Dimensions WxDxH: (640x410x220)mm
- Weight without units: 11.5kg (approx.)
- Internal power supply plug prim.: 90-240V, sec.: 12V/8.3A
- Lockable case
