

DIGIMIC®

Discussion system - wireless

SYDMIC02(wireless)_LB.E.090310 BRÄHLER ICS is committed to continually improving its products and so reserves the right to make technical modifications without notice.

Description

DIGIMIC – the most reliable conference and discussion system for over three decades now takes you beyond digital. The wireless DIGIMIC is based on an intelligent protocol, which assures the audio quality and reliability of a wired conference system, combined with the flexibility and freedom of wireless technology. Basic systems require basic functionalities. DIGIMIC operates autonomous without any further controlling device, enabling a really fast and simple setup procedure. Registration of wireless DMic units and the adaption to local frequency conditions runs fully automatic. Of course several systems can be used parallel within different conference rooms. The digital conference system provides a 100% stand alone solution and is completely self-configuring. With DIGIMIC it is easier than ever before to setup even larger and complex conference systems. Once a microphone unit is switched on it is ready for use instantly.

The shown basic version (DIGIMIC wireless) is a discussion system with microphone functionality. It consists of the radio basic station DSpark with the assigned delegate units DMic and/or DChair. To provide an inexpensive basic wireless conference solution the DSpark (Radio Transceiver Station) is able to operate autonomously. The microphone operating mode AUT3 with option PRIO is implemented. The delegate's frontend – the microphone unit with the docking station – offers a thoughtful ergonomic design enabling the delegate to concentrate on the conference. It has a high quality microphone and two loudspeakers for decentralised sound, automatically switched off when the corresponding microphone is activated.

System Components

- DSpark** Radio Transceiver Station for DIGIMIC wireless system
- DChair** Delegates' Unit with PRIO functionality and additional *mute all* button
- DMic** Delegates' Unit with illuminated microphone button
- DDoc** Docking Unit for DMic/DChair
- TMD/01** Conference Microphone with ring-shaped live indicator and integrated wind shield functionality, gooseneck
- TM58/6** Conference Microphone with ring-shaped live indicator, gooseneck

Accessories

- K45/16** Conference Headphone
- DCen** Central Control Unit for controlling and supplying of up to 100 wired system units
